

BURSARY SCHEME MANAGEMENT

01

Is your organization facing challenges in effectively managing students funded at tertiary institutions?

02

Are the demanding tasks associated with handling student issues, tertiary administration, and the collection of student information overwhelming your department?

03

Perhaps your organization is contemplating initiating a student funding program at tertiary institutions but is unsure of where to begin.

Look no further—L&T Edu-Solutions offers well-organized Bursary Scheme Management services designed to assist organizations in supporting their bursars. The service is structured around three key pillars:

- **Administration:** This encompasses administrative tasks such as candidate recruitment, university enrolment, fee payments, and results collection.
- **Mentorship:** This pillar focuses on the personal development of students through mentorship programs, including university visits, student meetings, and on-demand student support.
- **Professional Development:** This involves a collection of programs intended to produce graduates who are industry-ready. Workshops cover training on presentation skills, work readiness, and soft-skills development. These programs have been developed through years of interaction with students and companies, ensuring that they benefit both the student and the funding organization. We provide quarterly reports containing student profiles that offer a comprehensive understanding of students' behaviours, study patterns, performance and challenges. Continuous efforts are made to address challenges faced at the university and target areas that require improvement.

Founded in 2015, L&T EduSolutions has supported over 10,000 learners nationwide, focusing on regions like Limpopo, North West, Mpumalanga, and the Northern Cape. We collaborate with leading mining companies like Anglo American, De Beers, Glencore, Modikwa Joint Venture, and Hotazel Manganese. Our social investment partners include JET, KST, and Tshikululu, while we also work closely with universities such as UNIVEN, Vaal, and NWU.
