

L&T EDU-SOLUTIONS

DIRECT LEARNER SUPPORT

STEM careers consistently rank high on the DHET National Scarce Skills List, yet enrolment in these fields remains persistently low, even at the high school level. Schools in rural areas and mining towns are particularly impacted, with subpar results in STEM subjects contributing to a limited improvement in the representation of professionals from these regions.

In response to this challenge, L&T Edu-Solutions has developed specifically tailored educational programs implemented at the high school level. These initiatives aim to enhance both learners' academic performance and their enrolment in Maths and Science. The program includes:

- Daily Tutorial Sessions
- Mock Assessments and Feedback
- Career Guidance and Support for Bursary Applications
- Study Skills Development and Tips
- University Applications and Readiness Programs
- Coding and Robotics programme

With over 7 years of experience in learner support, we can implement programs that are not only effective but also impactful. Our programs ensure active engagement and participation from learners, parents, teachers, and the Department of Education throughout the entire duration. We take pride in our professionalism, delivering services at the highest standard of quality, and continuously striving to enhance the services we provide to our clients.

Our programs can be integrated into a company's Corporate Social Responsibility initiatives for community development or incorporated into a company's skills development and training efforts with the aim of expanding the pool of candidates eligible to participate in the company's training programs.

Founded in 2015, L&T EduSolutions has supported over 10,000 learners nationwide, focusing on regions like Limpopo, North West, Mpumalanga, and the Northern Cape. We collaborate with leading mining companies like Anglo American, De Beers, Glencore, Modikwa Joint Venture, and Hotazel Manganese. Our social investment partners include JET, KST, and Tshikululu, while we also work closely with universities such as UNIVEN, Vaal, and NWU.
